The preliminary amendment filed March 21, 2000 has been entered and the previous office action is withdrawn. New office action is as follow.

1. Claims 1-48 are presented for examination.
2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-16, 18-40, and 42-48, drawn to a branch history information (BHI) write control device for not writing BHI concurrently with an instruction memory access, classified in class 712, subclass 240.
 - II. Claims 17 and 41, drawn to a branch history information write control device for not operating return address stack when the BHI write request issuing call or return branch instruction is not executed (committed), classified in class 712, subclass 238.
3. The inventions are distinct, each from the other because of the following reasons:
Inventions of *group I* and *group II* are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because *the invention of group I can be used in a system without the control for not operating the return address stack when the BHI write request issuing call or return branch instruction is not executed (committed)*. The subcombination has separate utility such as *use in a system without the control for not writing BHI concurrently with an instruction memory access*.
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter and the search required for one group is not required for the other group, restriction for examination purposes as indicated is proper.

Art Unit: 2181

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kenneth S KIM whose telephone number is (703) 305-9693. The examiner can normally be reached on M-F (8:30-17:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mark Rinehart can be reached on (703) 305-4815. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 872-9306 for regular communications and (703) 872-9306 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 305-3900.
